

REQUEST FOR PROPOSALS
FOR
COUSHATTA WASTEWATER TREATMENT PLANT FLOODPLAINS ANALYSIS AND REPORT
FOR
COUSHATTA TRIBE OF LOUISIANA
PROJECT NS-24-RQ6

The Coushatta Tribe of Louisiana (Tribe) with Federal assistance from the U.S. Indian Health Service (IHS) is soliciting proposals for professional services related to the National Environmental Policy Act (NEPA) review to prepare for future Federal assistance in the refurbishment and commissioning of an existing offline wastewater treatment plant (WWTP) on Tribal Trust Land.

The existing WWTP, which was constructed in 2008 and never brought online, was constructed within the floodplain according to FEMA floodplain maps. Because of this, the Federal Emergency Management Agency (FEMA) 8-step decision-making process is required to be carried out to determine NEPA compliance of the proposed-action in relation to floodplains. Proposals are being solicited for completion of the 8-step decision-making process and related activities.

Proposals for the performance of the work must be received before 2pm on September 4, 2025. Interested companies should contact to obtain a copy of the RFP:

Steve Manuel, Infrastructure Manager

Coushatta Tribe of Louisiana
